

Income

Charlottesville and Albemarle County Decile Distribution

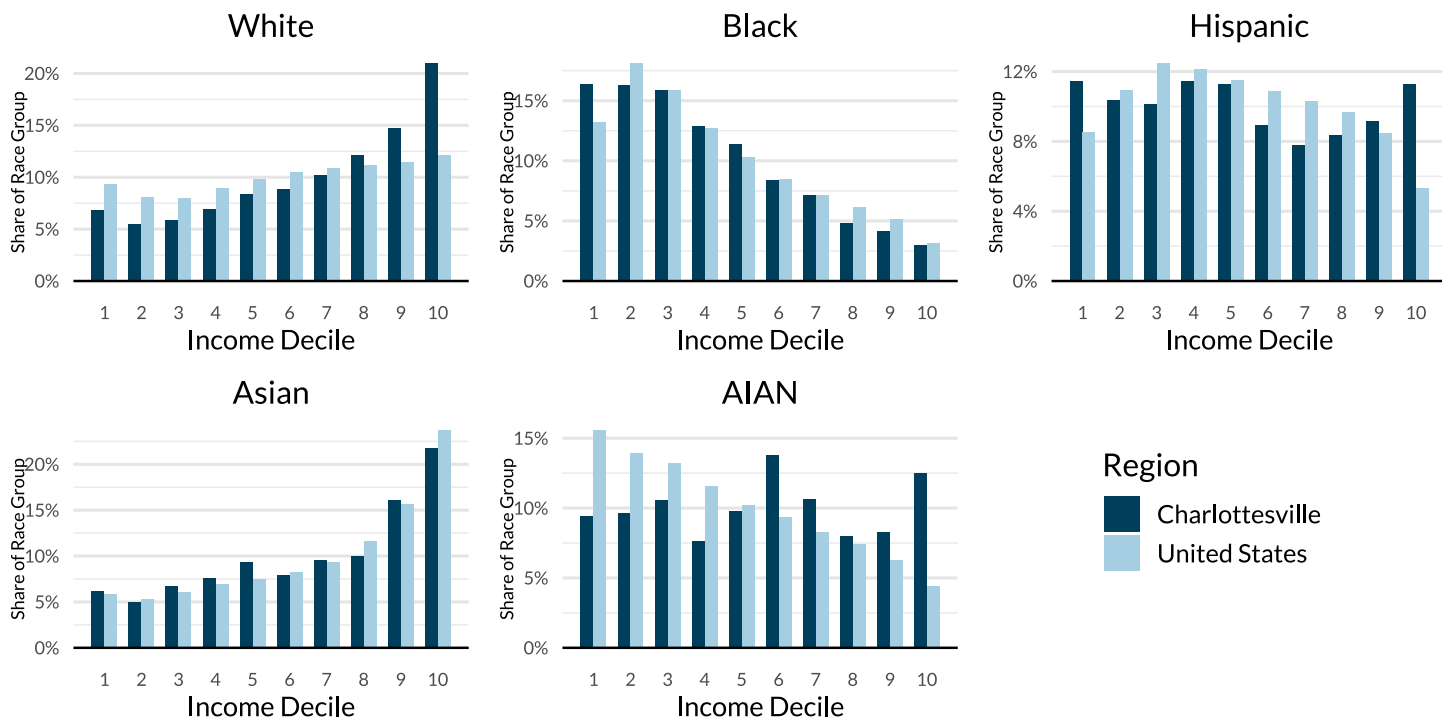

Income deciles divide the national population into ten equal income bins. The first decile reflects the 10% of the U.S. population with the lowest income, while the 10th decile reflects the 10% of the population with the highest income. The figure shows the share of the Charlottesville City and Albemarle County population within each decile of the national income distribution.

30% of the Charlottesville population is in the top 2 deciles.

Decile	Avg Income (2024 \$)	Annual Growth	Population (2024)	Share of Pop.
1	\$0	-100.0%	12,548	8.5%
2	\$20,263	-1.8%	11,490	7.8%
3	\$39,916	-0.7%	11,958	8.1%
4	\$59,163	-0.3%	13,476	9.1%
5	\$80,081	-0.1%	12,437	8.4%
6	\$103,194	0.1%	12,868	8.7%
7	\$130,046	0.3%	14,093	9.6%
8	\$165,658	0.5%	15,322	10.4%
9	\$224,740	0.8%	18,274	12.4%
10	\$676,166	1.6%	24,888	16.9%

Race Specific Income Distributions: Charlottesville and Albemarle vs. U.S.

- The dark blue bars show the share of the population within each decile of the national income distribution for each race in Charlottesville while the light blue bars show the income decile distributions for every race in the U.S.
- The set of figures shows how race specific income distributions in Charlottesville differ from U.S. race specific income distributions
- A positive slope indicates a higher proportion of individuals in the upper deciles while a negative slope indicates a higher proportion of individuals in the lower deciles.
- Differences between the dark and light blue lines indicate a difference in income distribution for the given decile.
